

Deloitte Australia – Data Analytics Job Simulation

Summer Internship Audit

Name: Yugam Roll No.: 2410030687 Semester & Section: 5th 3CSE11

About the Job Simulation

Completed a **Deloitte Data Analytics Job Simulation** through Forage, comprising two practical, real-world tasks designed to mirror the work of a data analyst at a leading professional services firm.

The simulation focused on **analysing data and drawing useful conclusions** — core competencies in any data-driven role.

Task 1

Data Analysis using Tableau

Task 2

Forensic Technology using Excel

Task 1 — Data Analysis

Objective

Explore Daikibo's machine telemetry data and create an interactive dashboard to answer key client questions about machine performance.

Tool

Tableau

4 Factories

Daikibo manufacturing
locations

9 Machine Types

At each factory location

Every 10 Minutes

Data collected — May
2021

JSON Format

Raw data provided for
analysis

Analysis & Dashboard

Client Questions

- Which location had the most machine breakdowns?
- Which machines broke most often in that location?

Work Done

- Analysed the telemetry data
- Compared machine breakdowns across locations
- Created visualizations in Tableau
- Built a dashboard to explore the results

Task 2 — Forensic Technology

Objective

Help the team investigate **unfair pay** across Daikibo's workforce by analysing equality data and identifying discriminatory patterns.

Tool

Microsoft Excel

Factory

Manufacturing location
identifier

Job Role

Employee position category

Equality Score

Range: **-100 to +100** (0 is
ideal)

Data Classification

A **4th column – Equality Class** was added to classify each Equality Score and make the data easier to analyse and support the investigation.

Within ± 10 Fair Example: Score of 10 → Fair	Beyond ± 10 Unfair Example: Score of -9 → Unfair
Beyond ± 20 Highly Discriminative Example: Score of -30 → Highly Discriminative	

Skills & Learning

Tableau

- Data visualization
- Dashboard creation
- Data exploration

Excel

- Data classification
- Data analysis
- Drawing conclusions

Overall Takeaway

Learned how to use data to identify patterns and support business conclusions in a real-world professional context.

Conclusion

1

Analyse

Real-world machine telemetry & equality data

2

Visualize

Tableau dashboard for machine breakdown insights

3

Classify

Employee equality data using Excel

4

Conclude

Data analysis supports investigations & business decisions

Certificate of Completion

Completed through **Forage** — Deloitte Australia Data Analytics Job Simulation

Deloitte.

yugam sachdeva
Data Analytics Job Simulation

Certificate of Completion
June 22nd, 2026

Over the period of June 2026, yugam sachdeva has completed practical tasks in:

Data analysis
Forensic technology

Tina McCreery
Chief Human
Resources Officer,
Deloitte
